### DETAILED ACTION

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 54-57 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The originally filed specification of 09/876,103 and parent application 09/240,839, now U.S. Patent No. 6,252,648 only disclose a second supplier (element 10a) that supplies either oxygen or clean air but not an inert gas. Clean air cannot be an inert gas since it contains oxygen.

3. Claims 20-22,26-32,37,40-53 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Makino in Japan Patent No. 1-228,687 discloses laser welding in a chamber filled with an inert gas. Moribe in Japan Patent No. 9-70,682 discloses in figure 9 supplying clean air into a closed space and an inert gas into a casing.
